

Product Name:5MM 7-color Lighting auto-Twinkling Rainbow LED PCB Sensor Module RGB LED Module

Quick Details:

Type	LED
Input power supply	3.3v to 5v
Output voltage	3.3V/5V
LED color	7-color
Pack Size	5cm x 4cm x 3cm
Material	PCB
Weight	4g
Color	Black

Features:

- 1.Module using S8050 transistor drive;
- 2.Operating Voltage 3.3V-5V;
- 3.With fixed bolt hole for easy installation;
- 4.Small plates PCB size: 3.2cm * 1.3cm;
- 5.When the I / O port input is low level, the buzzer sounds;
- 6.Module Interface Description (3-wire);

VCC external 3.3V-5V voltage (can be directly connected to 5v and 3.3v MCU);

GND external GND;

I / O external microcontroller IO port;

Package Included:

1pcs 5MM 7-color Lighting auto-Twinkling Rainbow LED PCB Sensor Module RGB LED Module
