

FIT0800

Amphibious Horizontal Submersible Pump

Use this amphibious micro submersible pump to build a small fountain, make auto water changer, or DIY plant-watering project!

This product is powered by 3-6V and has the characteristics of low noise, high efficiency, and easy cleaning. With an IP68 waterproof rating, the pump can be immersed into water, but the water level should be higher than the pump. Or you can just connect water pipes to the pump water inlet and outlet to move water from here to there.

SPECIFICATION

Power Supply Voltage: DC 3-6V

Current: 150~370mA

Pump Lift: 25-45cm

Flow: 80-100L/H

Power: 0.4~2W

Water Inlet and Outlet: 5mm/0.20"
