

CD74HCT4052, CD54/74HC4053, CD54/74HC54053 HIGH-SPEED CMOS LOGIC ANALOG MULTIPLEXERS/DEMULIPLEXERS

Check for Samples: [CD74HC4051](#), [CD54/74HCT4051](#), [CD54/74HC4052](#),

FEATURES

- **Wide Analog Input Voltage Range. . ±5 V Max**
- **Low ON Resistance**
 - 70 Ω Typical ($V_{CC} - V_{EE} = 4.5\text{ V}$)
 - 40 Ω Typical ($V_{CC} - V_{EE} = 9\text{ V}$)
- **Low Crosstalk Between Switches**
- **Fast Switching and Propagation Speeds**
- **Break-Before-Make Switching**
- **Wide Operating Temperature Range**
–55°C to 125°C
- **CD54HC/CD74HC Types**
 - **Operation Control Voltage 2 V to 6 V**
 - **Switch Voltage 0 V to 10 V**
 - «
- **CD54HCT/CD74HCT Types**
 - **Operation Control Voltage . . . 4.5 V to 5.5 V**
 - **Switch Voltage 0 V to 10 V**
 - V

- **Direct LSTTL Input Logic Compatibility**
 $V_{IL} = 0.8\text{ V Max}$, $V_{IH} = 2\text{ V Min}$
- **CMOS Input Compatibility**
 $I_I \leq 1\ \mu\text{A}$ at V_{OL} , V_{OH}

DESCRIPTION

These devices are digitally controlled analog switches which utilize silicon gate CMOS technology to achieve operating speeds similar to LSTTL with the low power consumption of standard CMOS integrated circuits.

These analog multiplexers/demultiplexers control analog voltages that may vary across the voltage supply range (i.e., V_{CC} to V_{EE}). They are bidirectional switches thus allowing any analog input to be used as an output and vice-versa. The switches have low ON resistance and low OFF leakages. In addition, all three devices have an enable control which, when high, disables all switches to their OFF state.

ORDERING INFORMATION⁽¹⁾

| | Maximum junction temperature | | | 150 | °C |
| | Maximum storage temperature range | | -65 | 150 | °C |
| | Maximum lead temperature (soldering 10 s) | | | 300 | °C |

(1) Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

(2) All voltages referenced to GND unless otherwise specified.

(3) The package thermal impedance is calculated in accordance with JESD 51-7.

Recommended Operating Conditions

For maximum reliability, nominal operating conditions should be selected so that operation is always within the following ranges.

| PARAMETER | | | MIN | MAX | UNIT |
|-------------------------|---|--|----------|----------|------|
| V_{CC} ⁽¹⁾ | Supply voltage range (T_A = full package temperature range) | CD54/74HC types | 2 | 6 | V |
| | | CD54/74HCT types | 4.5 | 5.5 | |
| $V_{CC} - V_{EE}$ | Supply voltage range (T_A = full package temperature range) | CD54/74HC types, CD54/74HCT types (see Figure 1) | 2 | 10 | V |
| V_{EE} ⁽²⁾ | Supply voltage range (T_A = full package temperature range) | CD54/74HC types, CD54/74HCT types (see Figure 2) | 0 | -6 | V |
| V_I | DC input control voltage | | GND | V_{CC} | V |
| V_{IS} | Analog switch I/O voltage | | V_{EE} | V_{CC} | V |
| T_A | Operating temperature | | -55 | 125 | °C |
| t_r, t_f | Input rise and fall times | 2 V | 0 | 1000 | ns |
| | | 4.5 V | 0 | 500 | |
| | | 6 V | 0 | 400 | |

(1) All voltages referenced to GND unless otherwise specified.

(2) In certain applications, the external load resistor current may include both V_{CC} and signal line components. To avoid drawing V_{CC} current when switch current flows into the transmission gate inputs, the voltage drop across the bidirectional switch must not exceed 0.6 V (calculated from r_{ON} values shown in Electrical Specifications table). No V_{CC} current will flow through R_L if the switch current flows into terminal 3 on the HC/HCT4051; terminals 3 and 13 on the HC/HCT4052; terminals 4, 14, and 15 on the HC/HCT4053.

Recommended Operating Area as a Function of Supply Voltages

Analog Channel Specifications

Typical values at $T_A = 25^\circ\text{C}$

| PARAMETER | TEST CONDITIONS | HC/HCT TYPES | V_{EE} (V) | V_{CC} (V) | HC/HCT | UNIT |
|--|---|--------------|-----------------|-----------------|--------|------|
| C_I | Switch input capacitance | All | | | 5 | pF |
| C_{COM} | Common output capacitance | 4051 | | | 25 | pF |
| | | 4052 | | | 12 | |
| | | 4053 | | | 8 | |
| f_{MAX} | Minimum switch frequency response at -3 dB (see Figures 12, 14, 16) | 4051 | -2.25 | 2.25 | 145 | MHz |
| | | 4052 | | | 165 | |
| | | 4053 | | | 200 | |
| | | 4051 | -4.5 | 4.5 | 180 | |
| | | 4052 | | | 185 | |
| | | 4053 | | | 200 | |
| Sine-wave distortion | See Figure 5 | All | -2.25 | 2.25 | 0.035 | % |
| | | All | -4.5 | 4.5 | 0.018 | |
| Switch OFF signal feedthrough (see Figures 13, 15, 17) | See Figure 7 ⁽²⁾ (3) | 4051 | -2.25 | 2.25 | -73 | dB |
| | | 4052 | | | -65 | |
| | | 4053 | | | -64 | |
| | | 4051 | -4.5 | 4.5 | -75 | |
| | | 4052 | | | -67 | |
| | | 4053 | | | -66 | |

(1) Adjust input voltage to obtain 0 dBm at V_{OS} for $f_{IN} = 1$ MHz

(2) V_{IS} is centered at $(V_{CC} - V_{EE})/2$.

(3) Adjust input for 0 dBm

(1) The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

(2) Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

(3) MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) Only one of markings shown within the brackets will appear on the physical device.

Important Information and Disclaimer: The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

- NOTES:
- All linear dimensions are in inches (millimeters).
 - This drawing is subject to change without notice.
 - This package is hermetically sealed with a ceramic lid using glass frit.
 - Index point is provided on cap for terminal identification only on press ceramic glass frit seal only.
 - Falls within MIL STD 1835 GDIP1-T14, GDIP1-T16, GDIP1-T18 and GDIP1-T20.

N (R-PDIP-T**)

PLASTIC DUAL-IN-LINE PACKAGE

16 PINS SHOWN

- NOTES:
- A. All linear dimensions are in inches (millimeters).
 - B. This drawing is subject to change without notice.
 - Falls within JEDEC MS-001, except 18 and 20 pin minimum body length (Dim A).
 - The 20 pin end lead shoulder width is a vendor option, either half or full width.

D (R-PDSO-G16)

PLASTIC SMALL OUTLINE

- NOTES:
- A. All linear dimensions are in inches (millimeters).
 - B. This drawing is subject to change without notice.
 - C. Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0.006 (0,15) each side.
 - D. Body width does not include interlead flash. Interlead flash shall not exceed 0.017 (0,43) each side.
 - E. Reference JEDEC MS-012 variation AC.

D (R-PDSO-G16)

PLASTIC SMALL OUTLINE

- NOTES:
- A. All linear dimensions are in millimeters.
 - B. This drawing is subject to change without notice.
 - C. Publication IPC-7351 is recommended for alternate designs.
 - D. Laser cutting apertures with trapezoidal walls and also rounding corners will offer better paste release. Customers should contact their board assembly site for stencil design recommendations. Refer to IPC-7525 for other stencil recommendations.
 - E. Customers should contact their board fabrication site for solder mask tolerances between and around signal pads.

PW (R-PDSO-G16)

PLASTIC SMALL OUTLINE

4040064-4/G 02/11

- NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
 - B. This drawing is subject to change without notice.
 -  Body length does not include mold flash, protrusions, or gate burrs. Mold flash, protrusions, or gate burrs shall not exceed 0,15 each side.
 -  Body width does not include interlead flash. Interlead flash shall not exceed 0,25 each side.
 - E. Falls within JEDEC MO-153

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, enhancements, improvements and other changes to its semiconductor products and services per JESD46, latest issue, and to discontinue any product or service per JESD48, latest issue. Buyers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All semiconductor products (also referred to herein as "components") are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its components to the specifications applicable at the time of sale, in accordance with the warranty in TI's terms and conditions of sale of semiconductor products. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by applicable law, testing of all parameters of each component is not necessarily performed.

TI assumes no liability for applications assistance or the design of Buyers' products. Buyers are responsible for their products and applications using TI components. To minimize the risks associated with Buyers' products and applications, Buyers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any patent right, copyright, mask work right, or other intellectual property right relating to any combination, machine, or process in which TI components or services are used. Information published by TI regarding third-party products or services does not constitute a license to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of significant portions of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI components or services with statements different from or beyond the parameters stated by TI for that component or service voids all express and any implied warranties for the associated TI component or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

Buyer acknowledges and agrees that it is solely responsible for compliance with all legal, regulatory and safety-related requirements concerning its products, and any use of TI components in its applications, notwithstanding any applications-related information or support that may be provided by TI. Buyer represents and agrees that it has all the necessary expertise to create and implement safeguards which anticipate dangerous consequences of failures, monitor failures and their consequences, lessen the likelihood of failures that might cause harm and take appropriate remedial actions. Buyer will fully indemnify TI and its representatives against any damages arising out of the use of any TI components in safety-critical applications.

In some cases, TI components may be promoted specifically to facilitate safety-related applications. With such components, TI's goal is to help enable customers to design and create their own end-product solutions that meet applicable functional safety standards and requirements. Nonetheless, such components are subject to these terms.

No TI components are authorized for use in FDA Class III (or similar life-critical medical equipment) unless authorized officers of the parties have executed a special agreement specifically governing such use.

Only those TI components which TI has specifically designated as military grade or "enhanced plastic" are designed and intended for use in military/aerospace applications or environments. Buyer acknowledges and agrees that any military or aerospace use of TI components which have **not** been so designated is solely at the Buyer's risk, and that Buyer is solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI has specifically designated certain components as meeting ISO/TS16949 requirements, mainly for automotive use. In any case of use of non-designated products, TI will not be responsible for any failure to meet ISO/TS16949.
