

Product Name:DHT11 Compatible Digital Temperature Humidity Sensor For Arduino

Product Description:

- 2.DHT11 sensor adopts.
- 3.The module can detect surrounding environment of the humidity and temperature.
- 4.High reliability and excellent long-term stability.
- 5.Output form digital output.
- 6.Has fixed bolt hole and easy installation.
- 7.Humidity measurement range: 20%~90%RH.
- 8.Humidity measurement error: $\pm 5\%$ RH.

Package Included

Packing List	Qty
Humidity Sensor Module	1
