

Real-time RTC Relay Timing Switch Module With Time Clock

Product Description

- Type: Real-time Realy
- Voltage power supply: 5V ~ 60V
- OPE: relay closure time
- CLE: relay off time
- Contact Load: Low Power

- Wide voltage supply 5.0V–60V;
- A pattern can be set for more than five time periods;
- With buzzer alarm function.
- Functional mode introduction:
 - OPE: relay closing time CLE: the relay is off time.
 - Time period: PE-1 to PE-5 5 time period.
 - “-” : function masking.
- P-1: every day the OPE relay closed/output pulse CLE relay disconnects/outputs pulses.
- P-2: when the OPE relay is closed/output pulse CLE relay disconnects/outputs pulse.
- P-3: on the day of a few months :OPE relay closure/output pulse CLE relay disconnect/output pulse.
- P-4: from a few months to a few months of a few months, every day at the beginning of the day, to the end of several points: the OPE relay closure/output pulse CLE relay disconnects/outputs the pulse.
- P-5: starting from several days to several days a month, to the end of several points: the OPE relay closure/output pulse CLE relay disconnects/outputs the pulse.
