

PERFWIPE ESD Alcohol Dispenser Bottles Specification

Descriptions:

ESD Alcohol dispenser bottles are designed to dispense alcohol, acetone, isopropanol, ethanol and other solvent applied with swabs, wipes and cotton ball.

The dispenser comes with a hinged lid to keep out impurities, while the container is not in use and the stainless steel parts facilitate the use of aggressive solvents.

A precision valve prevents contents to vaporize and leak, to ensure total purity, the pump head is sealed with a band to prevent solvent leaking.

Composition & Attributes

Material: Stainless steel, plastic

Surface Resistance: $10^6 \sim 10^9$ Ohms

Color: white, pink, blue

Volume: 120ml, 180ml, 240ml

Rubber Band: Inside with white rubber band to prevent solvent leaking

Features:

The anti-static alcohol bottle is made of stainless steel and conductive plastic

The lid to ensure the reagent not to be polluted when not use.

The stainless steel head prevent impurities into the bottle when not in use.

Precision pump head can ensure solvents volatilized.

Application

The ESD alcohol dispenser bottles are widely applied for electronics, cleanroom, chemical lab, etc

Order Informations:

Code	Size	Packaging
SSESDABD-120ML	120ml	20pair/box 200pair/ctn
SSESDABD-180ML	180ml	20pair/box 200pair/ctn
SSESDABD-240ML	240ml	20pair/box 200pair/ctn
